

## IRScan® PTZ controller

Virtual keyboard

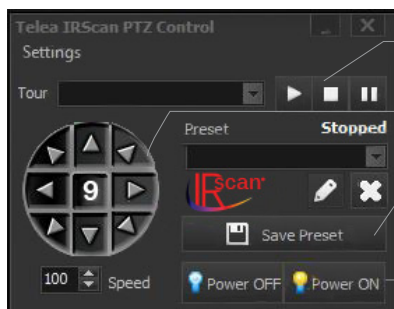

### Description

Telea has developed IRScan®, a complete series of products and software for fire detection system or automation solutions based on Infrared camera.

IRScan PTZ controller is a virtual keyboard that manages up to 9 PTZ for thermal imaging devices. Used together with Ethernet RS485/IP server, it allows a full control of pan&tilts, including preset management and tour, over Ethernet LAN.

Telea IRScan PTZ controller is able to running overlay on the original infrared camera software.

### Main functions

- Start & preset management (manual)
- Management of the displacements and select the moving speed
- Store a preset or a tour of preset
- Power On / Off is an auxiliary command that can be used to power or power-down the thermographic cameras installed on PTZ board.

### Basic system configuration
